

How We Deliver your Hot Tub or Spa

All of our spas, saunas and swim spas are delivered by huge, articulated trucks to our depot.

Your spa can then be loaded on to a special trailer which has been made specifically for spa deliveries.

Simply Spas France Spa Dolly

The Spa Dolly or hot tub trailer and delivery system is the original and best method for delivering and installing hot tubs.

It's virtually the same width as a car and has a small trailer that can deliver the spa on its side so that every home or garden is accessible without even damaging the grass!

Most spas are very easy to put in place, normally delivery and installation will take around 3 hours.

Most spa deliveries are done without the aid of a crane, however this can be easily arranged if necessary.

In difficult cases, delivery can be made by helicopter and we have negotiated fabulous prices on spa and deliveries.

Swim spa Delivery

Our swim spas are delivered by lorry and then put on a 6m flatbed trailer, they are very heavy and will in all cases require lifting equipment to put them in place.

Once in place they are very easy to install, the most time consuming element of the installation is filling it up!

You would be surprised to see where we have put some of our spas and swim spas, half way up a mountain, craned over the top of a hotel, on an Alpine balcony in the snow.

Simply Spas

EXTREME RELAXATION

Swim spas can be in ground above ground or semi sunk, the choice is yours. I'm happy to say we have yet to find a spot which is impossible!

Delivery charges

Our Spas and Swim spas come from depots in Europe and the UK and are delivered by articulated lorries. We have negotiated the best possible price for delivery with our preferred transport companies.
